目次

Scope.....	1
1. Introduction.....	2
2. Objectives	7
3. Market and User Trends related to 5G.....	8
3.1 Shift from PCs to Devices such as Smartphones and Tablets and wearable terminals	8
3.2 Increase in Location-Based Services	9
3.3 Forefront of a new way of building human relations with a focus on women.....	10
3.4 Introduction of the Sharing Economy	12
3.5 Introduction of Artificial Intelligence and Robots.....	13
3.6 Self-Driving Vehicles	14
3.7 Internet of Things (including industry, wearables, and agriculture)	15
3.8 Changes in the Work Style	17
3.9 Acceleration of Fintech Services	18
3.10 Penetration of Peer to Peer Service.....	19
4 Traffic Trend	20
4.1 General	20
4.2 Communication traffic growth and traffic nature trend.....	20
4.2.1 Communication traffic growth	20
4.2.2 Communication traffic nature	22
5 Cost Implications	25
5.1 General	25
5.2 Costs per communication traffic aspect	26
5.3 User density perspective	29
5.4 Daily dynamics aspect.....	35
5.5 Capital investment aspect.....	39
5.6 Conclusion	39
6. 5G Key Concept.....	42
6.1 Key Concepts of 5G.....	42
6.2 5G key technical aspects	43
6.2.1 General.....	43
6.2.2 Advanced Heterogeneous network.....	44
6.2.3 Network Softwarization and Slicing.....	45

6.3	5G Typical Use Cases	46
6.3.1	Ultra-reliable and low latency communications	46
6.3.2	Massive Connection.....	48
6.3.3	eMBB enhanced Mobile Broadband (Data rate, Capacity, Mobility)	48
7.	Typical Usage Scenarios of 5G.....	50
7.1	Four representative typical usage scenarios	50
7.2	Case studies of Typical Usage Scenarios	52
7.3	Dynamic approach	72
8	Requirements for 5G.....	76
8.1	High level requirements.....	76
8.2	Requirements related to 5G radio access network.....	76
8.2.1	Definitions of the requirements	76
8.2.2	List of 5G RAN requirements and their mapping to use cases.....	79
8.3	Requirements for 5G networks	79
9.	Spectrum Implications	82
9.1	Concept for 5G spectrum.....	82
9.2	Below 6GHz.....	84
9.2.1	Roles of bands below 6GHz.....	84
9.2.2	Technical Implementation and Challenges.....	85
9.2.3	Current spectrum allocation and its plan in Japan, below 6GHz	86
9.2.4	Spectrum identified for IMT below 6GHz in WRC-15.....	87
9.3	Above 6GHz.....	87
9.3.1	Roles of bands above 6GHz.....	87
9.3.2	Preferred frequency ranges/bands	87
9.3.3	Technical implementation issue and Challenges.....	93
9.3.4	WRC-19 Agenda Item 1.13	95
	Annex [9] Characteristics of propagation loss above 6GHz	98
	Terminology, abbreviations	102
10	Overview of 5G Technologies	103
11	5G Radio Access Technologies	104
11.1	General	104
11.2	Overview of 5G radio access network.....	104
11.3	RAN related technical works update	105
11.3.1	General.....	105

11.3.2	Information of technical works related to modulation or coding scheme....	105
11.3.3	Information of technical works related to multiple access scheme, duplex scheme	111
11.3.4	Information of technical works related to MIMO or multiple antenna technologies.....	114
11.3.5	Information of technical works related to RAN deployment or is control schemes	117
11.3.6	Information of technical works related to certain use cases or applications	122
11.3.7	Information of technical works related to energy saving nature.....	123
11.3.8	Information of technical works related to RAN virtualization	125
11.3.9	Other information of technical works related to ‘5G’ RAN	126
12.	Network Technologies for 5G.....	130
12.1	Technology focus area.....	130
12.2	Network softwarization.....	132
12.2.1	General definition.....	132
12.2.2	Network softwarization in 5G	133
12.2.3	Information Centric Network (ICN) enabled by network softwarization.....	140
12.3	Management and Orchestration	146
12.3.1	Overview	146
12.3.2	Approaches for 5G network management.....	148
12.4	Fronthaul and Backhaul.....	168
12.4.1	Overview	168
12.4.2	Fronthaul technologies.....	180
12.4.3	Backhaul technologies	182
12.5	Mobile Edge Computing (MEC).....	188
12.5.1	Overview of MEC	188
12.5.2	Application of MEC.....	194
13.	Conclusion	206
	Annex Future Business and Services	209

Scope

This white paper addresses the results of studies carried out by the Fifth Generation Mobile Communications Promotion Forum (5GMF) in Japan. As a result of the study, the white paper proposes two key concepts of 5G and two main key technologies required to realize these key concepts.

The scope of the study also includes market and user trends, traffic trends, cost and spectrum implications, typical usage scenarios, and requirements of 5G. Radio access technologies and network technologies of 5G are also addressed. In the Annex, the perspectives of future business and services are introduced for reference.
